

## **Industrial Visit to Water Treatment Plant**

Date: 14-Aug-2014

Program co-ordinator: Dr. Chintan Pathak, Prof. Pallavi Nayak

Students of 5<sup>th</sup> sem ES department went to Kotarpur water treatment plant of capacity 650 MLD, installed at Kotarpur located in the north of Ahmadabad. At present, Kotarpur treatment plant is getting water from Raska and Narmada canal through intakewell in Sabarmati River. This WTP is mostly a conventional WTP with unique modification & and a very efficient system.

Also the WTP was fully manually operated which made the student understand every procedure in detail. It provided an opportunity for active learning experience for the students outside the classroom. Students were very enthusiastic & interacted with the Technical officer & Assistant Technical officer. Students are currently writing a report on the WTP.
